

## O.C. Haley Blvd. Streetscape Project St. Andrew St. to Calliope St.

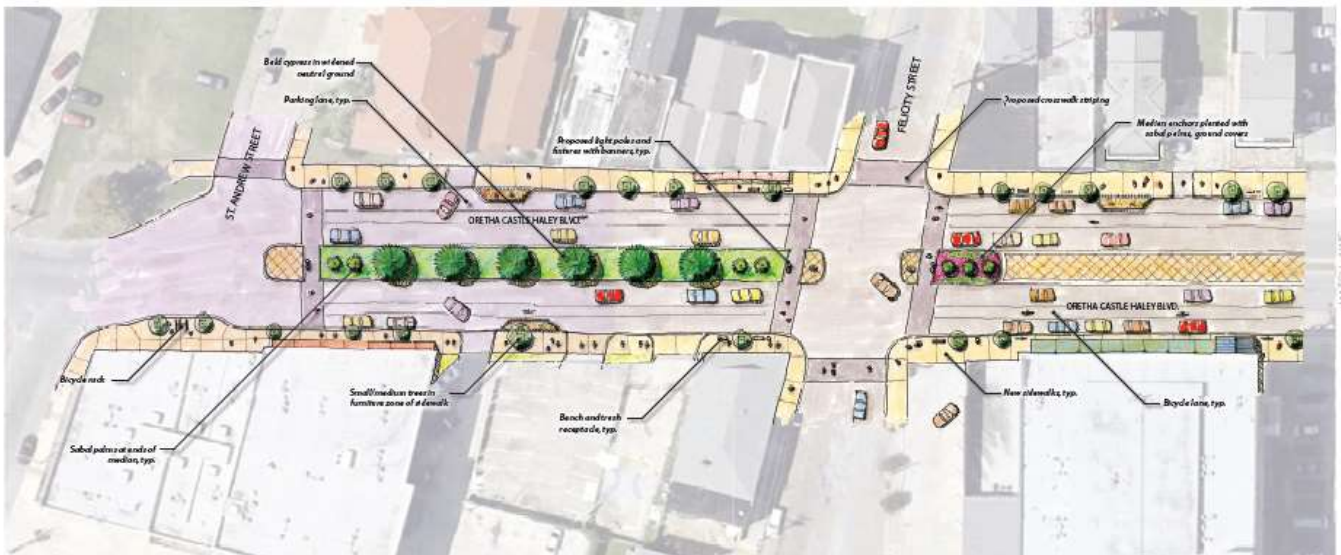

A streetscape is a public improvement project that enhances the public area and triggers subsequent recovery and investment in surrounding neighborhoods. This development is designed to help create additional and continued private investment in the City's key recovery areas.

The proposed scope of work for this project includes:

- Widening the existing median between Felicity St. and Martin Luther King Blvd. and paving it in stamped concrete.
- Installing wider medians between St. Andrew and Felicity streets, and Martin Luther King Blvd. and Calliope St., these medians will be landscaped.
- Installing new Americans with Disabilities Act-compliant curb ramps.
- Repairing damaged sidewalks
- Improving landscaping
- Converting the roadway from two travel lanes and a parking lane into a parking lane, bicycle lane and travel lane in each direction
- Striping new high visibility crosswalks and bike lane
- Asphalt roadway repairs (pending bid responses)

The design of the O.C. Haley Blvd. streetscape project is complete and will be available for public bid in March 2015. Construction is currently scheduled to begin in summer 2016. Total cost for this project is approximately \$1,800,000 and is funded by Disaster - Community Development Block Grants. The project was designed by GEC, Inc. The construction contract will be determined in summer 2016.

During construction, residents and businesses can expect to experience temporary construction inconveniences such as limited access to areas within the construction zone, movement of heavy equipment, safety signage, fences and sounds.

Questions about this project may be directed to Cheryn Robles at the Department of Public Works at 504-658-8046 or [crobles@nola.gov](mailto:crobles@nola.gov).
